Dear Parents/Carers

Maths Holiday Challenges - Summer 2021

Wow - what a year! If ever we all needed a Summer Break, this is most definitely it. Your children have worked incredibly hard to close some of the gaps in learning created by the last 18 months and have been hugely successful.

In order to build on this, I have listed below some ideas to engage with Maths over the holidays. This should in no way replace quality family activities like baking, playing board games, being in a paddling pool and so on, but more about bringing Maths talk into part of your everyday conversations and activities such as looking at the bus timetable, talking about numbers when you see them or discussing the ingredients listed on a tin.

In addition to these quality, informal conversations, there are some additional free resources to access online, or in the workbook form below. Please see below a link for each class to take you to a Family Maths book from the National Numeracy Charity on our website, filled with ideas for having fun with your family whilst engaging with maths over this summer - feel free to create your own versions or adaptations.

[Year 1](#)

[Year 2](#)

[Year 3](#)

[Year 4](#)

[Year 5](#)

[Year 6](#)

Try the challenges you fancy on a day and time suited to you. There is no expectation to complete them all and they should be engaging and fun - if at any point they are not, STOP! In addition to this, there is also My Maths (video lessons and tasks for Y1-6), TT Rockstars (times table practice) and the White Rose Maths Hub Pupil Resource Books (free to collect from your local Morrisons from 26th July or printable from the website). Feel free to add anything you do to Seesaw and if you have any difficulties logging into any of these materials, please contact your child's teacher before the end of term.

Have a fabulous summer.
